MOHAMMED SHAHAN *Software Engineer*

mohamadshahan@gmail.com | 9741234998 | moshahan786 | MoShahan

Profile

Frontend engineer with 4 years of experience building React and TypeScript products for fintech and healthcare clients, with working knowledge of Node.js/Express, REST APIs and databases from full-stack projects. Use AI across the development workflow, from writing code, test cases and CI workflows to reviewing edge cases and refining styling and design, while owning architecture, testing and code review myself.

Skills

Frontend — Angular | React | Vue.js | TypeScript | Next.js | React Native

Backend — Express.js | Python | REST APIs

Database — MongoDB | PostgreSQL | Prisma

Tools — Git | GitHub Actions | Jest

AI-assisted development — Code | Testing | Workflows | UI design

Experience

Product Development Engineer I
Razorpay under Cognitive Clouds
June 2024 – April 2026
Bangalore, India

- Built frontend modules for Razorpay's loyalty platform (gift vouchers, memberships, partner offers) using React / TypeScript / Angular, for partners including Visa, Mastercard, ICICI, DBS, Axis, IDFC, Cashify, etc.
- Built reusable React and TypeScript components that standardized UI across partner programs and sped up new partner launches.
- Integrated REST APIs for offer fulfillment and membership lifecycle with backend engineers.
- Raised code quality through testing and detailed PR reviews; my PRs needed fewer review changes over time.

Associate Software Engineer
Cognitive Clouds
September 2022 – May 2024
Bangalore, India

- Built and maintained client web and mobile apps with React / Vue / React Native / TypeScript, including DoveMed MyCircles (Vue web app and React Native iOS/Android app on Django REST APIs).
- Built responsive UI components with tests for release stability.

Front End Developer - Trainee
Cognitive Clouds
April 2022 – August 2022
Bangalore, India

- Trained in React / React Native / TypeScript, with testing and code coverage practices.

Web Application - Front End Team
First Kampus (Internship)
September 2021 – August 2022
Mangalore, India

- Collaborated within the front end team to architect and build a comprehensive web application dedicated to streamlining campus placement processes.

RPA Using UiPath
Novigo Solutions (Internship)
August 2021 – October 2021
Mangalore, India

- Engineered a suite of automated workflows using UiPath Studio to optimize repetitive business processes and enhance operational efficiency.

Education

Bachelor of Engineering in Computer Science & Engineering
P A College of Engineering
August 2018 – July 2022
Mangalore, India
CGPA - 8.69/10

Projects

Xivi (Full-stack social app)
Tech: Next.js, Express, MongoDB, JWT, Material UI

- Posts with images, likes, comments, friend requests and follows; JWT and OAuth auth, notifications and admin feature flags.

Tandem (Multi-tenant sales ERP)
Tech: React, TypeScript, Express, Prisma, PostgreSQL, Zod

- Built org-isolated users, teams and role-based access control, with role-scoped dashboards, customizable widgets and in-app notifications.
- TypeScript monorepo with shared Zod schemas, row-level tenant isolation and cookie-based auth (access and refresh tokens).

Trove (E-commerce storefront)
Tech: Next.js, TypeScript, Material UI, Firebase Auth, Jest

- Built a responsive e-commerce storefront with catalog search, category filters, cart, wishlist, and checkout, using a public product API and Firebase email/password auth gated by Next.js middleware.

Cadence (Music catalog)
Tech: React, Vite, Express, Prisma, MySQL, Zod

- Song ratings, artist rankings, JWT auth and ImageKit cover uploads, with Zod validation shared by client and server.

Comic Reader (Local-first mobile app)
Tech: React Native, Expo, TypeScript, SQLite, Zustand

- Built a comic reader for CBZ files with a filterable cover library and resume-from-last-page reading, using SQLite and Zustand to save progress, and a windowed pager so large issues stay memory-safe.

Ledger Lens (Invoice review tool)
Tech: React, Vite, Express, Gemini API

- PDF upload, LLM extraction to a fixed schema, validation that flags mismatches, and user confirm/edit, with the user's edit as source of truth. Extracted data stays in the browser.

Anvil (React design system)
Tech: React, TypeScript, Storybook, Vite, Vitest

- Accessible component library (Button, Input, Dialog, Tabs, Toast and more) with design tokens, light/dark themes and Storybook docs; typed ESM package, built without a UI kit.
